

Did you know?
When empty, our helicopter weighs the same as 1,455 litres of water - that's enough for about 6,155 brews!

Sweepstake

Our crew have to be ready to head out on a lifesaving mission at the drop of a tea bag. Whether travelling by helicopter or car they bring the hospital to the patient, providing enhanced pre-hospital care to those who need it most. Unfortunately, this does mean that they often have to leave their freshly brewed cuppa.

£2

Question - How many brews get left behind in our crew room every year?

Name, guess, mobile number				

How to play: Write down your guess for how many brews are left. Once everyone has made a guess, or all the squares have been taken, reveal who got the closest answer.
